OXBOW AT HOME

What does venomous mean?

There are 42 species of snakes that are native to Georgia, or call Georgia home. Only six of those species are venomous species. What fraction (and/or percentage) of snake species that live in Georgia are venomous?

The venomous species in Georgia include Copperhead, Cottonmouth (or Water Moccasin), Coral, Eastern Diamondback Rattlesnake, Timber Rattlesnake, and Pygmy Rattlesnake. Three of the species in Georgia are types of rattlesnakes. What fraction of total snake species in Georgia are rattlesnakes?

Eastern Diamondback Rattlesnakes can grow up to 7 feet long. How many inches long is that? How many centimeters long is that?

Hint: 1 foot = 12 inches
1 inch = (about) 2.5 centimeters
